

Math Motivators Virtual Tutoring Center

Our Mission: The goal of Math Motivators is to close the opportunity gap to, in turn, close the achievement gap by using a volunteer-driven math tutoring program that pairs underserved middle and high school students with professionals and college students with strong mathematics backgrounds.

How it works

Volunteer tutors support math education and serve as mentors for students in grades 5-12. There is also a free prep program for the math section of the SAT and ACT.

A Math Motivators tutor will be paired up with the student at a mutually convenient time. We provide weekly 1-hour virtual tutoring sessions.

Students will need to have access to a computer or tablet with internet connection. We use the Zoom platform with breakout rooms for the tutoring sessions.

"I just wanted to say that the Math Motivators program has been helping me so much, I am so grateful for the opportunities I have been given this year."

-8th grader at St. Paul, MN

Safety is a Top Priority

Students and parents/guardians are provided information about the tutoring program, including safety precautions, what to expect of the tutors, what is expected of students, and a student participation consent form.

Tutors and students do not exchange contact information unless approved by the parent/guardian. Every tutoring session is monitored by a Math Motivators staff member.

All tutors must pass a background check and attend training sessions.

"I am reaching out to all of you to say Thank You as I hear (my student) down the hall engaging with one of the Math Motivators tutors. Thank you for identifying him as someone who would engage with the tutors via distance learning and for giving him the chance to strengthen his math skills and confidence in this way... I know Distance Learning is a challenge for everyone. Thank you all for the work you are doing to support students right now."

-Parent of an 8th grader at St. Paul, MN

How to Enroll

Use the QR Code below to go to our Math Motivators Tutoring registration website and create an account. Once you have signed up, you will be contacted with more information about setting up tutoring time. If you need more information, contact
